WORK EXPERIENCE

Findrome – The Finance Cell of NMIMS MPSTME

Finance Sub Head

June 2025 - April 2026

Led finance-focused initiatives involving **industry research, financial analysis, and development of finance-related content and reports.**

Mentored and guided finance executives on **fundamental financial concepts, analytical approaches, and research methodologies.**

Contributed to the planning and execution of **finance-centric events and competitions**, coordinating cross-functional teams and operational requirements.

Conducted research on companies and industries to support **equity research, financial analysis, and educational initiatives.**

M/s. Jay A Shah & Associates

Financial Analyst Intern

May 2024 - July 2024

Assisted in **financial statement preparation, audit documentation, and basic budgeting** under the supervision of senior team members.

Supported the analysis and organisation of financial data to facilitate **financial reporting and business analysis.**

Gained practical exposure to **accounting processes, financial documentation, and analytical review.**

EDUCATION

SVKM's NMIMS Mukesh Patel School of Technology Management & Engineering

Bachelor of Technology in Data Science - 8.34 GPA

July 2024 - June 2028

Nirmal Memorial College Of Science - Integrated

12th HSC - 75%

July 2022 - April 2024

Ryan International School

10th ICSE - 92%

April 2009 - May 2022

PROJECTS

Oil Market Intelligence System [🔗](#)

April 2026

Developed a market intelligence system integrating Brent crude prices, OPEC production data, regime detection and Monte Carlo simulation for oil-price analysis.

Implemented Markov regime-switching methodology to identify distinct market states and estimate regime-dependent price dynamics.

Built an interactive Streamlit dashboard incorporating market forecasts and news sentiment analysis.

Robotic Arm [🔗](#)

March 2025

Developed a working robotic arm prototype using Arduino (C++) and Python, integrating DC motors and gesture-based control to replicate precise gripping and movement mechanisms.

Research Paper - Matrix Compression Using DCT – IEEE IESES 2025

April 2025

4th IEEE International Conference on Industrial Electronics for Sustainable Energy Systems 2025

Co-authored research on DCT-based matrix compression, contributing to the implementation and evaluation of compression techniques while analysing information preservation and computational efficiency. **Accepted at the 4th IEEE International Conference on Industrial Electronics for Sustainable Energy Systems, 2025.**

SKILLS

Programming: Python (Pandas, numpy, Scikit-learn, Matplotlib, Plotly, Statsmodels)

Machine Learning: Regression, Classification, PCA, Time Series Analysis, Markov Models, Monte Carlo Simulation

Finance & Quantitative Analysis: Basic Financial Modelling, Equity Research, Portfolio Analysis, Financial Markets.

Databases: MySQL, SQL Server

Tools & Platforms: Microsoft Excel, Google Sheets, Bloomberg Terminal, Git, Streamlit, VS Code

Other: Data Visualisation, Statistical Analysis, Research & Technical Documentation
